Pediatric Pulmonology 6:301–302 (1989)

Subject Index to Volume 6

a/A_{O_2} ratio, 2
Acute respiratory failure, 253
Aerochamber, 263
Aerosol therapy, 263
Age distribution and sarcoidosis, 69
Age-matched controls, 109
Age-sex anthropometric correlation, 14
Airway cross-sectional area, compliance, 223
Airway pressure, 14
Airway resistance and elastance, 86
Alveolar-arterial O_2 gradient, 158
Amniocentesis (6 hours prepartum), 109
Anesthetized intubated dogs, 122
Antibody immunofluorescence, 164
Apgar score, 42
Apnea, 105
Apparatus resistance and dead space, correction for, 118
Arterialized capillary blood, 169
Arterial oxygen tension, 27
Asthma in children, 81, 113, 223
Asymptomatic CF, 42
Atropine, 74

"Baby hugger" method, 36
Bacterial resistance, side effects, 91
Baseline bronchodilation, 81
Bennett-Twin vs. Wright nebulizer, 99
Bivariate and multivariate analysis, 138
Blood gases, 158
Body plethysmography, 232
Body weight-normalized C_{RS}, 2
Bronchial hyperreactivity, 113, 253
  distilled water-induced, 232
Bronchial occlusion; artificial, spontaneous alectasis, 147
Bronchiolitis, mild vs. hospitalized, 138
Bronchodilator aerosols, separate and combined effects, 74
Bronchopulmonary dysplasia, 36, 49, 74

Caffeine, 49
cAMP, 237
  -elevating compounds, 237
Cardiovascular variables, 158
Cataracts, posterior subcapsular, 260
Central airways obstruction, 272
Charcoal spots, 122
Children, 6–9 years old, 127
Chloride secretion, decrease of, 164
Chlorine gas, 191
Combined bronchodilator and chest physical therapy, 103
Comparative FEV_1 values on 2 consecutive days, 113
Comparison of derivation methods, 242
Computed tomography, 186
Computer model simulations, 8, 86
Correlations with serum Bi, HbF, 180
Corticosteroids, 260
Cotton rat, 164
Cough and breathlessness score, 263
Cough flow-volume relationships, 223
Cough slope, 223
Crying, 14
Cystic fibrosis, 1, 19, 27, 42, 53, 91, 103, 172, 237, 260

Diltiazem, 53
Disaturated phosphatidylcholine, 109
Dose dependence, 81
Dot immunobinding assay, 109
Double-blind-crossover study, 74
Duchenne muscular dystrophy, 169

End-inspiratory driving pressure, 86
Endotracheal tube, 8, 137, 183
End-tidal pressure, controlled, 31
Epinephrine, 237
Exercise-induced asthma, pathomechanism, 81
Expiratory flow limitation, 272
Expiratory flow-volume slope, 86
Enzymatic assay, 109

False-positive CF screening test, 42
Fiberoptic bronchoscope, for laryngoscopy, 183
F_{IO_2}, 2
First week of life, 2
FITC-BSA, 213
Flow-volume loops, 8, 86
Fluorescence polarization immunoassay, 246
Fluorescent microscopy, 213
Forced expiratory flow, 36
Forced vital capacity, 169
Froskolin, 237
Fungal diseases of the lung (Book Review), 133

Gas exchange, 2
Grid intercept procedure, 213

Haemophilus influenzae, 153
High-frequency chest wall oscillation, 122
High-frequency pneumatic flow interrupter, 158
Histamine, 99, 113, 242
Hyaline membrane disease, 2
Hypercapnia, 169
Hypercapnic respiratory failure, 169
Hypoxemia, 27

Immune deficiency diseases, 275
Immunoreactive trypsinogen screening, 42
Infants and children, 186
Intraoperative vs. deferred histology, 268
Intravenous theophylline, 172
Intubation, 183
Ipratropium bromide, inhaled, 81

Linear growth pattern, retrospective study, 260
Logistic regression, 27
Long-term efficacy of Tobramycin aerosol, clinical score, antibody response, alkaline phosphatase, 91
Lung lavage, 158
Lung perfusion, 147

Maximum expiratory deflation flow-volume curve, 253
Maximum inspiratory and expiratory pressures, 14, 27, 127
Mean airway pressure, 158
Mechanical ventilation, 31, 49, 253
MEFV/cough peak flow ratio, correlations with height/age, 223
Membrane depolerization, 237
Metaproterenol, inhaled, 74, 103
  add-on device, 263
Metered dose inhaler, 263
  add-on device, 263

Methacholine, 81
Minimum acceptable maneuvers, 127
Minute ventilation, 49
Mucus clearance, 122
Mucus velocity, 122
Multiple occlusion technique, 2
Mycoplasma pneumoniae, 232

Na and Cl movement, 164
Necessary maximum attempts, 127
Nifedipine, 53
Nonperiodic vs. periodic apneas, 195
Normal saline-placebo, 172
Nosocomial pneumonia, 153

Obstructed breaths, "ordinary" vs. "swallow breaths," 195
Occlusión vs. single-step plesthysmography, comparison of, 118
Oscillation, chest wall, 122
Overestimation of $StcO_2$ with decreasing SaO_2, 180
Oxygen consumption, resting, 19
Oxygen tension, predicted, 27

Pa_{CO_2} vs. FVC, correlation of, 169
Paracellular pathway, 164
Passive total respiratory system compliance, 2
PC_{20} FEV_1, derivation of, 242
$PD_{20}FEV_1$, 81
Peak airway pressure, 8
Peak expiratory flow, 86
Peak inflation pressure, 158
Pediatric asthma, 263
PEEP, 158
  measured at proximal vs. distal end of ET tube, 31
Percussion, vibration, 122
Perinatal asphyxia, 42
Pharmacokinetics, 172
Physiological dead space, 19
Placebo controls, 74
Plasma tracer, 213
PMNL degranulation, 237
PMNL function inhibition, 237
Positive response to bronchodilator, 253
Positive screening, 42
Post-extubation, 2
Post-intubation and serial studies, 153
Postural drainage, percussion-vibration, 103
Power of prediction, 246
Predictive power of positive results, 153
Predictors of wheezing, power of, 138
Preterminal event, 169
Prolonged apneic episodes, 195
Provocation testing, bronchial, 71
Pseudomonas aeruginosa, 91
Pseudotumor, subglottic inflammatory, 268
Pulmonary artery pressure, 53
Pulmonary blood flow, 147, 213
Pulmonary function tests, 36, 191
Pulmonary mechanics, 36, 49, 74
Pulmonary shunting, 158

Radiolabelled microspheres, 147
Radioopaque particles, 122
Radiotherapy, 268
Rapid compression technique postoperative normalization, 272
Regional distribution of ventilation, 8
Repeated testing, 2
Reproducibility, variability by methods of evaluation, 127
Reproducibility of measurements, 19
Respiratory failure, 253
Respiratory distress syndrome, 109, 147
Respiratory muscles, 14
Respiratory syncytial virus, 164
Resting oxygen consumption, 19
Right ventricular work, 53
RSV, influenza A, adenovirus, 232

Salbutamol administration, using MDI, 263
Sarcoidosis, 69
Scheffe's test, 242
Secondary water transport, 164
Selected Abstracts, 64, 203, 293
Seralyzer, 246
  (reagent strip reflectance photometer), 246
Serum from saliva levels, 246
Shape of airway obstruction, 8
Shoirt circuit current, resistance, 164
Single treatment, 74
Size-corrected energy expenditure, 19
Spirometry, 27
  body plethysmography, 172
Spontaneous vs. saline-induced apneas, 195
Steroid dose, duration of treatment, 260
Subclinical bronchospasm, 103
Subglottic airspace size, relation to gestation age, 183
Submicronic colloid aerosol, 147
Superoxide production, 237
Surfactant glycoproteins, 109
Surfactant proteolipids, 109

Theophylline, 237
  levels, monitored, 246
Throat and tracheal cultures, 153
Tidal-breathing method, 99
Time constant, compliance, 36
Time of maximal response to single dose, 172
Tissue culture infectivity, 164
Tobramycin aerosol therapy, 91
  80 mg b.i.d., 91
Total lung resistance, 49
Total resistive respiratory load, 103
Trachea, 31, 186
Tracheal epithelium, 164
Tracheal length, diameters, cross-sectional area, volume, 186
Tracheal lesions, 272
Transient cough peak flows, 223
Two correction formulas compared, practical applications, 118
Two wavelength pulse oximetry, 180
Two-way analysis of variance, 242

Variability, 86, 127
Ventilation, 19, 147, 158
Ventilatory equivalent, 19
Video-image analysis, 213
Viral bronchiolitis, 253
Viral pneumonia, 232

Wheezing, 138
Whole-body plethysmography, 36
